2017 812/2013

The image shows a standard European Energy Label for a refrigerator. At the top left is the European Union flag. To its right, the word "ENERG" is written in large letters, with "енергия · ενεργεια" below it. Further right are four circular icons containing the letters Y, IJA, IE, and IA. Below this is the Lamborghini logo and the text "Lamborghini CALORECLIMA". To the right of the logo is a string of characters: "o@ 'U \ V \ B\ \ ## \ ou' ='". Below the logo is a small icon of a refrigerator. The main part of the label features a vertical scale of energy efficiency classes from A+ (green) to F (red). A black arrow points to class C. Below the scale are two boxes: the top one contains "85 W" and the bottom one contains "300 L". At the bottom left is the year "2017" and at the bottom right is the standard number "812/2013".
